

## Industry Specific Training Needs

- Eliminate the tedious work of the induction process.
- Conform to Industry Standards and set Uniform Training Standards across your organisation in any field you choose.
- Effectively train your entire at-risk staff in the Health and Safety regions.
- Display correct procedures that are unique to your business.
- Have a record of what knowledge your staff have retained and know about your company.
- Refer to the training as many times as you like and to as many people as you like.

We listen to your needs and write scripts to achieve them.

We keep communication lines open right through the editing process to ensure you get the result you want.

## Visual Imagery is the Answer to Learning Retention

We look beyond the image, never forgetting that images must communicate your company's philosophy and mandates. Our studio is equipped to give you a high quality end product using:

- High-Definition DVCAM and HDV video cameras.
- Highly professional camera crew at affordable rates.
- You have full access to our full video editing lounge and correct any detail allowing you to have full input to finished product.
- Highly trained make over voices that communicate clear concise English.
- Access to a large bank of live video clips that are applicable to your script before we even begin filming saving many hundreds of hours of footage.
- For the first time you have control of your employees training schedules and requirements all from your office.

If you are in HR, you probably still get a kick out of helping people improve their skills.

Think your job would be more fun if it was easier to say YES to more training to more people?

Just plug and play our hard drive into your network and you have an instant intranet-based e-learning system, accessible to anyone you choose via your network.

Smart Trainer's learning management system bundles, international standard courses, and exam simulators with powerful administration and reporting software at 'empoweringly' low prices.

Smart Trainer knocks down the road blocks to learning. Smart Trainer makes it easy to say Yes.
